

Ebinger Manufacturing Co
"The Race for Quality and Value Has No Finish Line"

Description: Carbide Rotary/Percussion Drill Bits (Masonry Bits)

Premium Quality. Carbide rotary/percussion drill bits (masonry bits). These quality drill bits are tipped with tungsten carbide and specially designed for the drilling of brick, tile, granite, concrete and other hard-wearing materials. Uniform cutting and clearance angles for extraordinary sharpness. These drill bits can be used with either a rotary drilling machine for softer material like brick, tile, marble and sandstone, or with a percussion type drilling machine in hard material like concrete and granite. A single drill bit serves both purposes. Made in Europe.

Status: Active
